Cayman Express ATM Now Available at Texaco (Walker's Rd.)

With the recent addition of Cayman National Bank's *Cayman Express ATM* to the Texaco station on Walker's Road, the station's customers can now pick up a beverage, some fuel and US\$ or CI\$ CASH all in one location.

"We are extremely pleased to partner our services with Texaco, a strong local company, known for its availability and service. Our customers' demand for increased convenience, service and access has led us to explore the use of alternate banking channels in order to deliver our services in a cost-effective, reliable and confidential manner," commented Lach MacTavish, Chief Operations Officer.

Due to an increased demand for an ATM facility at the Texaco station, the Management of Cayman National Bank and Texaco agreed to relocate the Bank's West Wind Branch lobby ATM to the Walker's Road fuel station.

"Many of our customers have indicated their preference for conducting their financial transactions at locations other than our Bank Branches. The convenience, access and service factors at the Texaco Station are all present to make this a choice location for both our local and foreign customers," explains David McConney, CNB President

Persons who have a debit card or credit card, displaying the Visa, MasterCard, Plus or Cirrus logos may use the ATM to access their account, withdraw US\$ or CI\$ cash, transfer funds between their accounts and enquire into their account activity.

With the largest ATM network in the Cayman Islands, Cayman National is excited to announce that yet another one of its ATMs has been made available to its customers and non-customers. Currently, CNB has 17 *Cayman Express ATMs* positioned in the Cayman Islands as well as two Self Service Centres, which house a Cayman Global (Internet banking) kiosk and Cayman In-Touch (telephone banking) facilities. All three of these alternative-banking options are absolutely FREE to the Bank's customers as they are a part of Cayman National's *Better Way to Bank* initiative.
